PROFESSIONAL SUMMARY

Software Engineer with 8+ years of experience designing, developing, and optimizing enterprise-grade applications across the fintech, blockchain, and ERP domains. Specialized in .NET Core and C#, with a proven record of delivering scalable, high-performance systems for real-time financial trading, decentralized platforms, and multi-branch business operations. Skilled at translating complex business requirements into robust technical solutions and collaborating effectively within cross-functional and multinational teams.

PROFESSIONAL EXPERIENCE

Skyline — Software Engineer

Feb 2026 – Present

ACCOUNTING SYSTEM MODERNIZATION & ERP SUPPORT

- Spearheaded the modernization of a legacy VB6 accounting system, re-engineering it into a modern architecture built on .NET and Angular.
- Designed and developed a maintenance management system tailored to client-specific operational requirements.
- Provided ongoing support and resolved critical issues across the company's ERP platform, ensuring system stability and reliability.

ACS-Tech — Software Engineer

Sep 2025 – Feb 2026

CAR RENTAL ERP PLATFORM (.NET CORE)

- Developed and maintained a comprehensive Car Rental ERP system in .NET Core, engineered to streamline rental operations and optimize fleet management.
- Built core modules for vehicle reservations, rental agreements, invoicing, and customer relationship management.
- Architected a scalable, multi-branch solution capable of supporting high transaction volumes and concurrent operations.
- Integrated secure payment gateways and third-party APIs to enable real-time vehicle tracking and reporting.
- Improved system performance through asynchronous programming, strategic caching, and database query optimization.
- Partnered closely with product managers and clients to deliver ERP features precisely aligned with business objectives.

GTA Startup — Software Engineer

Mar 2024 – Dec 2024

ETHEREUM-LIKE CRYPTOCURRENCY PLATFORM • TURKEY

- Contributed to a blockchain-based financial platform modeled on Ethereum, focusing on decentralized applications (dApps) and smart contract integration.
- Designed and optimized core modules for transaction validation, wallet management, and secure API communication.
- Collaborated with a multinational team to implement token standards and uphold blockchain security best practices.
- Strengthened system scalability and reliability by introducing performance monitoring and automated testing frameworks.
- Played a pivotal role in aligning product functionality with real-world financial use cases, supporting the startup's go-to-market strategy in the cryptocurrency sector.

Equiti JO — Software Engineer

May 2019 – Oct 2022

FINANCIAL TRADING TECHNOLOGY • AMMAN, JORDAN

- Developed and enhanced a high-performance financial trading application that enabled brokers to display real-time prices and efficiently manage profit and loss, directly improving trading operations.
- Integrated Equiti's proprietary tools with MetaTrader 4 (MT4), streamlining trading workflows and expanding platform capabilities.
- Designed, developed, and rigorously tested a range of trader-facing tools, elevating user experience and operational efficiency.

Aspire Services — Software Engineer

Mar 2018 – Sep 2018

TEST AUTOMATION TOOLING · AMMAN, JORDAN

- Engineered a custom development tool that empowered QA testers to author and automatically translate test cases into executable scripts, significantly reducing manual effort and accelerating release cycles.
- Authored comprehensive test cases and scenarios using the in-house automation tool, ensuring high quality and reliability across client software solutions.
- Generated dynamic reports from automated test results, delivering critical insights into software performance and quality assurance.

Aspire Infotech — Software Engineer

Jan 2017 – Mar 2018

CLIENT TOOLS & ANALYTICS · AMMAN, JORDAN

- Developed and maintained administrative tools for a diverse client base, enhancing operational efficiency and client management capabilities.
- Collaborated with US-based teams to build advanced analytics tools, providing data-driven insights that supported strategic decision-making.
- Revamped and maintained client websites, ensuring optimal performance, security, and a refined user experience.

TECHNICAL SKILLS

01	Programming Languages C#, Java, JavaScript, HTML, CSS, C++, C, SQL
02	Frameworks & Libraries ASP.NET, Spring Boot, Angular, SignalR, Razor
03	Databases Microsoft SQL Server, MySQL, Redis
04	Protocols HTTP, TCP, UDP, SOAP
05	Tools & Platforms Visual Studio, JMeter, NetBeans, Android Studio, cAlgo, cTrader, MetaTrader, Eclipse, Git, RabbitMQ
06	Design Patterns Builder, Repository, Factory, Proxy, MVC
07	Core Concepts SDLC, Software Testing, Requirements Engineering, Automated Testing, Financial Applications, Real-Time Data Processing, Data Analytics, Web Development

EDUCATION

Bachelor of Software Engineering

Jordan University of Science and Technology — Ar Ramtha, Jordan
